

## Sino-Canadian High-Tech Center of Resources and Environment

SCH-CORE is a joint Canadian Chinese center in the field of environmental enhancement. The Center is focusing on key areas in:

- . Policy analysis and consultation
- . Solid waste management
- . Water and waste water management
- . Marine engineering
- . Mariculture
- . Intelligent systems and automation

Through joint projects, SCH-CORE will foster the application of new technologies and services in the rapidly growing environmental market in China.

SCH-CORE is a direct result of the signing of a Letter of Intent during the very successful "Team Canada" mission to China led by the Canadian Prime Minister Chretien in November 1994.

On November 27, 1995, SCH-CORE was officially opened with its head office in Beijing in the Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences. It is jointly established by the National Natural Science Foundation of China (NSFC), Chinese Academy of Sciences (CAS) and C-CORE in Canada.

Under the guidance of the Board of Directors and the consultation of the Board of Experts, SCH-CORE carries out research and development projects with industrial partners from Canada and China. The Board of Directors is chaired by Prof. Hu Zhaosen, Special Advisor, National Natural Science Foundation of China and Mr. D. Moryka, President & COO, Questor Technology Inc. with representation from senior levels of industry and government in China and Canada.

A joint workshop in 1995 identified 35 collaborative projects. Five projects have moved quickly to implementation.

### Network

SCH-CORE has already established a strong collaborative research network of partners in China and Canada to undertake its interdisciplinary R&D projects.

### Membership application

SCH-CORE is very pleased to have you as a member. If your organization specializes in research, technology development, manufacturing or service in the fields of sustainable use of resources and environmental enhancement, you need information about the biggest potential market in the world-China and Asia. SCH-CORE is ready to help you enter into the competitive market with a steady flow of accurate information on forthcoming public and private sector projects. If your organization needs technical assistance in improving your manufacturing or service quality, SCH-CORE is your ideal partner with its strong technical support organizations from China and Canada.

SCH-CORE Associates Membership may be just what you are looking for. Generally targeted at small and medium-sized enterprises, membership entitles the organizations to a lot of benefits including: access to SCH-CORE market surveys and commercial information about business opportunities in China, Canada and Asia, product data, cooperative partners, and other business-related information.

**If you would like further information on SCH-CORE, please contact:**
